

# Skilled Nursing Facility Education

DRIVEN BY EXCELLENCE | BUILT WITH INTEGRITY | PROUD TO BE ACTION

## What can we do for you?

**Contact:** David Rideout,  
Director of Training and Education

844 Woburn St  
Wilmington, MA 01887-3163  
Office: 978-253-2650  
Fax: 978-253-2568

Our programs are not limited to simply continuing education. We can provide evaluation tools for your facility. With the advent of the Do Not Resuscitate or DNR order, Skilled Nursing facilities have experienced a significant drop in "worked" cardiac arrests.

Any skill that is under utilized will deteriorate over time. With our state of the art simulation mannequin, advanced equipment, and subtle planning with your staff, we can provide a realistic cardiac arrest scenario in your facility. With the DVD and report you receive after the event, you can evaluate timing, skill, and resources in your healthcare setting.

As an American Heart Association CTC we can provide a full range of Advanced and Basic life support courses to providers, staff, and the public at large. Training is available at our corporate training center in Wilmington or in house at your facility. The choice is yours!

Whether it is recertification requirements, annual training, or disaster management and planning, we are here to assist you in your training needs. All this as well as providing seamless medical care, and when necessary, professional transport to needed services.

Our objective is to offer exceptional training and realistic simulations for your facility. From C.P.R. to continuing education, we can work together to assess your needs, tailor a program to meet them, and exceed your expectations.

As a Commonwealth of Massachusetts accredited training institution with over thirty years in the emergency medical service industry, Action Ambulance Service can provide your facility and staff with unparalleled service and experience.

## We cater to your training session particular needs.

Action is pleased that we can offer training with a state of the art simulation mannequin. All levels of training can be assessed as this mannequin can simulate findings in a basic patient assessment such as blood pressure monitoring, lung sounds as well as OPA placement. If you desire more advanced skills practice and assessment the training mannequin can also allow I.V. insertion, intubation and simulated defibrillation in an ACLS styled "mega code" allowing for a multitude of possible cardiac arrest situations. With this tool we can cater a training session to your particular needs.

# Web Based Training

Action Ambulance is proud to announce that we offer web based training through Webex.

What is

It is a Cisco System internet based training center. Users can easily log into a class and join from the comfort of their home or office.

Internet classes can be hosted live or with an on demand self paced program.

Webex allows participants to attend classes without the added expense of travel or unnecessary overtime.

Action Ambulance brings the education to you, in person, or online!

Call for information about this or any other program!

# CEUs

## Course Subjects 2hr - 2 CEU'S

**When patients fall:** This course addresses how to prevent further injury, as well as treating injuries sustained. 2 CEU'S

**Patient lifting and moving:** This program promotes proper lifting technique and appropriate handling of the patient. 2 CEU'S

**Mock code exercises:** With our simulation mannequin, these exercises can run BLS to ALS all the way to endotracheal intubation and medication administration. 2 CEU'S

**Interdisciplinary interface:** This program addresses the challenges coupling emergency medicine and long-term care of a patient. 2 CEU'S

**Infection control:** This course deals with prevention, identification, and treatment of infections, both surface and systemic. 2 CEU'S

**O.S.H.A. / Blood borne pathogens course:** This is designed for the Healthcare workers to inform and protect them from various pathogens. 2 CEU'S

**As well as CPR, AED, First-aid, and First responder initial training and recertification classes.**

Through consultation with your organization we can design courses specific to your needs. We can also provide insight for disaster planning and potential evacuation needs. Action Ambulance Service is truly a FULL Service provider.

All nursing level courses meet the requisites set forth in 244CMR5.00: for contact hours awarded to a particular course.

All programs are reviewed by our medical staff and teaching faculty. This assures high quality, accurate, and relevant information is relayed to all our students and clients.

**Medical Director:**

Dr. William Jackson F.A.C.E.P.

**Director of Training and Education:**

David Rideout NREMT-P I/C

**Faculty and AHA Instructor**

Patrick Gregg EMT-B I/C

**O.S.H.A. Compliance:**

Derick Aumann EMT-P

**A.H.A. Instructor**

Stacey Scott
